

INSTRUCTION FOR MAKING EXHIBITION SETS

Armando Andrade Tudela
Casas Alteradas
2006

Installation View

The 32 images referred to in this document are the single slides that are used to create one exhibition set consisting of 4 carousels. Each of the 4 carousels contains 19 slide mounts with 2 slides each. The list below shows the overlaying slide pairs in the orientation in which they are projected. The crucial information in this manual points out whether the slide sits at the front or rear in the mount and if the orientation of the slide is mirrored or upside-down.

Please note that the slides need to be put upside down into the mounts to ensure they are projected as shown below. The slide that sits at the front will have to be put in the carousel facing the lamp not the lens.
